Stripping Release Form

It's been our long experience that when a dog is 'shaved down' or 'stripped' as it is called in the dog grooming profession, pre-existing conditions may appear. When a dog is very matted, the air cannot get through to its skin. If the dog has an itch and bites itself or if the dog is biting from fleas, the skin will become sore and not be able to heal through the matted coat. Stripping uncovers these conditions and other skin problems that have developed from lack of air to the skin.

It is difficult to strip a matted dog without slightly irritating the skin since we have to get underneath the mats.

The only way we will consider stripping your dog will be with your consent.

There will also be additional charges for this service more blades have to be used, more coolant for clippers and more time has to be taken to slowly and carefully get underneath the mats.

I, the undersigned, owner or person representing the owner, do hereby release ZOOM GROOM Mobile Pet Spa and Navy Dog LLC from any and all responsibility from stripping my dog.
